Audit App: Features

Version of 18 October 2026 · https://auditapp.heiba.cloud

The Audit App covers a full financial statement audit, from client acceptance to the auditor's report and the archived audit file, in English and Arabic.

Highlights

- One place for every client, engagement, file, test, finding and sign-off.
- Dozens of audit tools, with AI help where it saves time.
- Full English and Arabic interface, right to left in Arabic, with Word documents in both languages.
- Roles, engagement teams, review and sign-off, and a complete activity log.
- A client portal for document requests and management responses.
- Works on CSV and Excel exports straight from the client's accounting system.

An engagement page

1. Firm and users

- Sign-in with email and password; 12-hour sessions; lockout after five failed attempts.
- Roles: preparer, reviewer, partner, admin and client.
- Self sign-up with admin approval.
- Engagement teams: staff see only the engagements they work on.
- Activity log of every change, download and sign-in, with file fingerprints and settings.
- Notifications bell ("What needs you") and a search box across engagements, findings and tasks.
- Arabic and English switch on every page, saved per user.

2. Planning

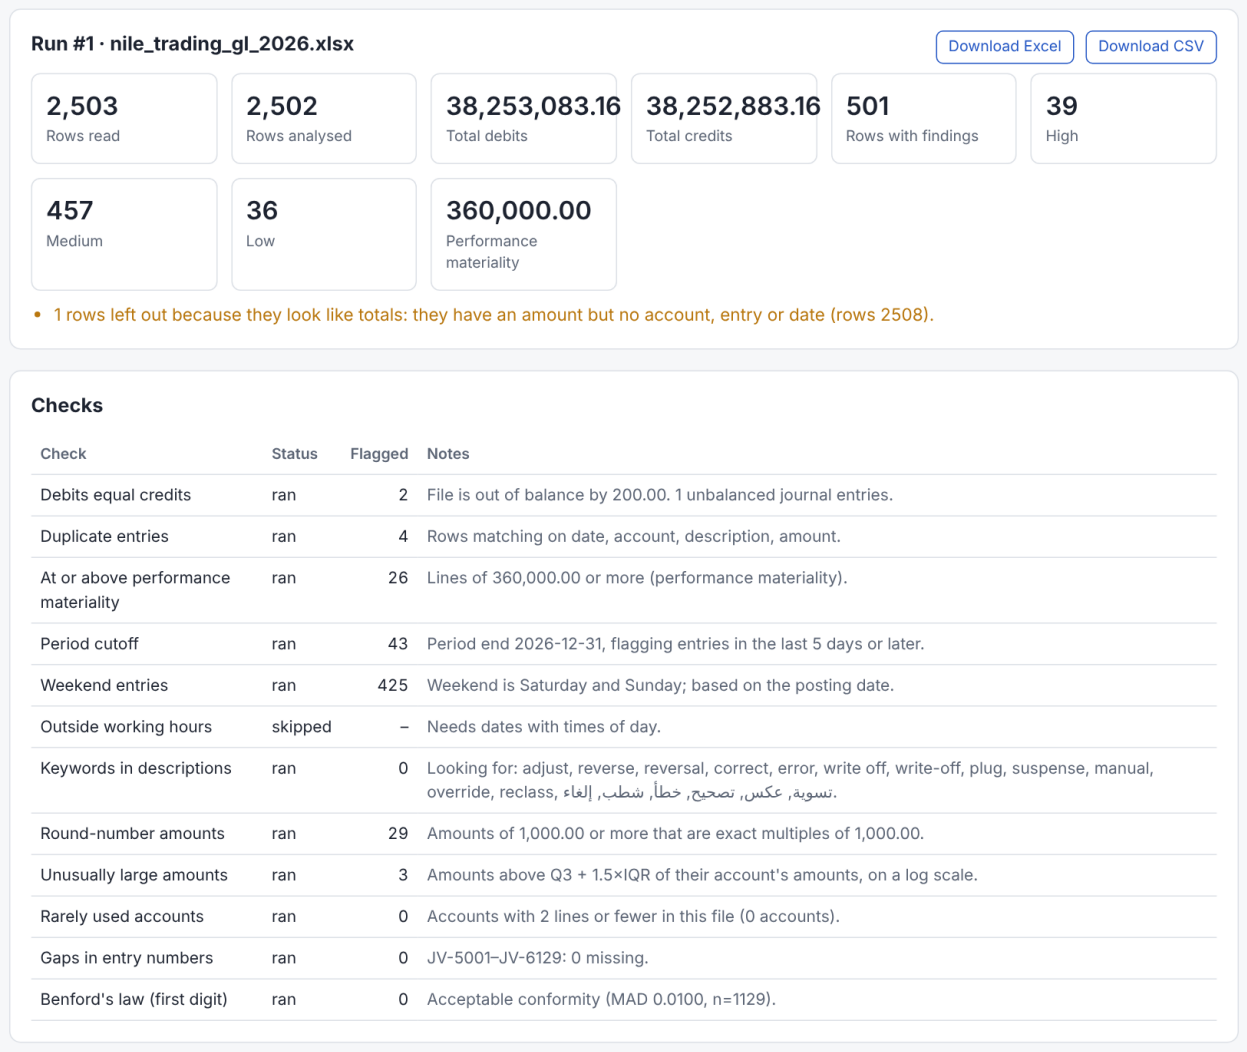

- Clients and engagements by period and framework.
- Acceptance and continuance checklist with partner decision; independence declarations.
- Engagement letter and planning memo, downloadable in Word (English or Arabic).
- Materiality calculator: overall, performance and clearly trivial, with rationale.
- AI risk assessment from the trial balance.
- Risk register linked to the audit program.
- Internal controls register with attribute sample size calculator and test results.
- Follow-up of last year's points.

3. Data import

- CSV and Excel files, with sheet choice and automatic header detection.
- Column mapping screen with suggestions; handles debit/credit or signed amounts, brackets and trailing minus.
- Import summary with control totals and skipped-row warnings.
- File types: general ledger, trial balance, prior-year trial balance, bank statement, receivables and payables listings, fixed asset register, inventory listing, payroll register and general lists.
- Every file stored with its SHA-256 fingerprint.

4. Journal entry testing

- Checks: balance, at or above performance materiality, duplicates, cutoff, weekend, round amounts, unusual amounts, Benford's law, gaps in entry numbers, after-hours postings, keywords and rarely used accounts.
- Risk score per entry and a "Riskiest entries" list.
- Firm templates for check settings.
- Quick audit: run the checks without saving.
- Excel and CSV reports.

Download Excel | Download CSV

2,503	2,502	38,253,083.16	38,252,883.16	501	39
Rows read	Rows analysed	Total debits	Total credits	Rows with findings	High

457	36	360,000.00
Medium	Low	Performance materiality

- 1 rows left out because they look like totals: they have an amount but no account, entry or date (rows 2508).

Checks

Check	Status	Flagged	Notes
Debits equal credits	ran	2	File is out of balance by 200.00. 1 unbalanced journal entries.
Duplicate entries	ran	4	Rows matching on date, account, description, amount.
At or above performance materiality	ran	26	Lines of 360,000.00 or more (performance materiality).
Period cutoff	ran	43	Period end 2026-12-31, flagging entries in the last 5 days or later.
Weekend entries	ran	425	Weekend is Saturday and Sunday; based on the posting date.
Outside working hours	skipped	–	Needs dates with times of day.
Keywords in descriptions	ran	0	Looking for: adjust, reverse, reversal, correct, error, write off, write-off, plug, suspense, manual, override, reclass, إلغاء, شطب, خطأ, تصحيح, عكس, تسوية.
Round-number amounts	ran	29	Amounts of 1,000.00 or more that are exact multiples of 1,000.00.
Unusually large amounts	ran	3	Amounts above Q3 + 1.5×IQR of their account's amounts, on a log scale.
Rarely used accounts	ran	0	Accounts with 2 lines or fewer in this file (0 accounts).
Gaps in entry numbers	ran	0	JV-5001–JV-6129: 0 missing.
Benford's law (first digit)	ran	0	Acceptable conformity (MAD 0.0100, n=1129).

Journal entry testing results

5. Analytics

- Prior-year comparison with thresholds.
- Ratio and trend analysis with going-concern warnings.
- Analytical procedures (ISA 520) and proofs in total for payroll, depreciation and interest.
- Stratification, summaries by account and user, and field statistics.
- Who posted what: same preparer and approver, cash and revenue posters.
- Account pairs (journal flow) analysis.
- Ledger explorer with filters and pivot.
- Match two files (for example vendors against employees).
- Receivables and payables aging.

6. Sampling and testing

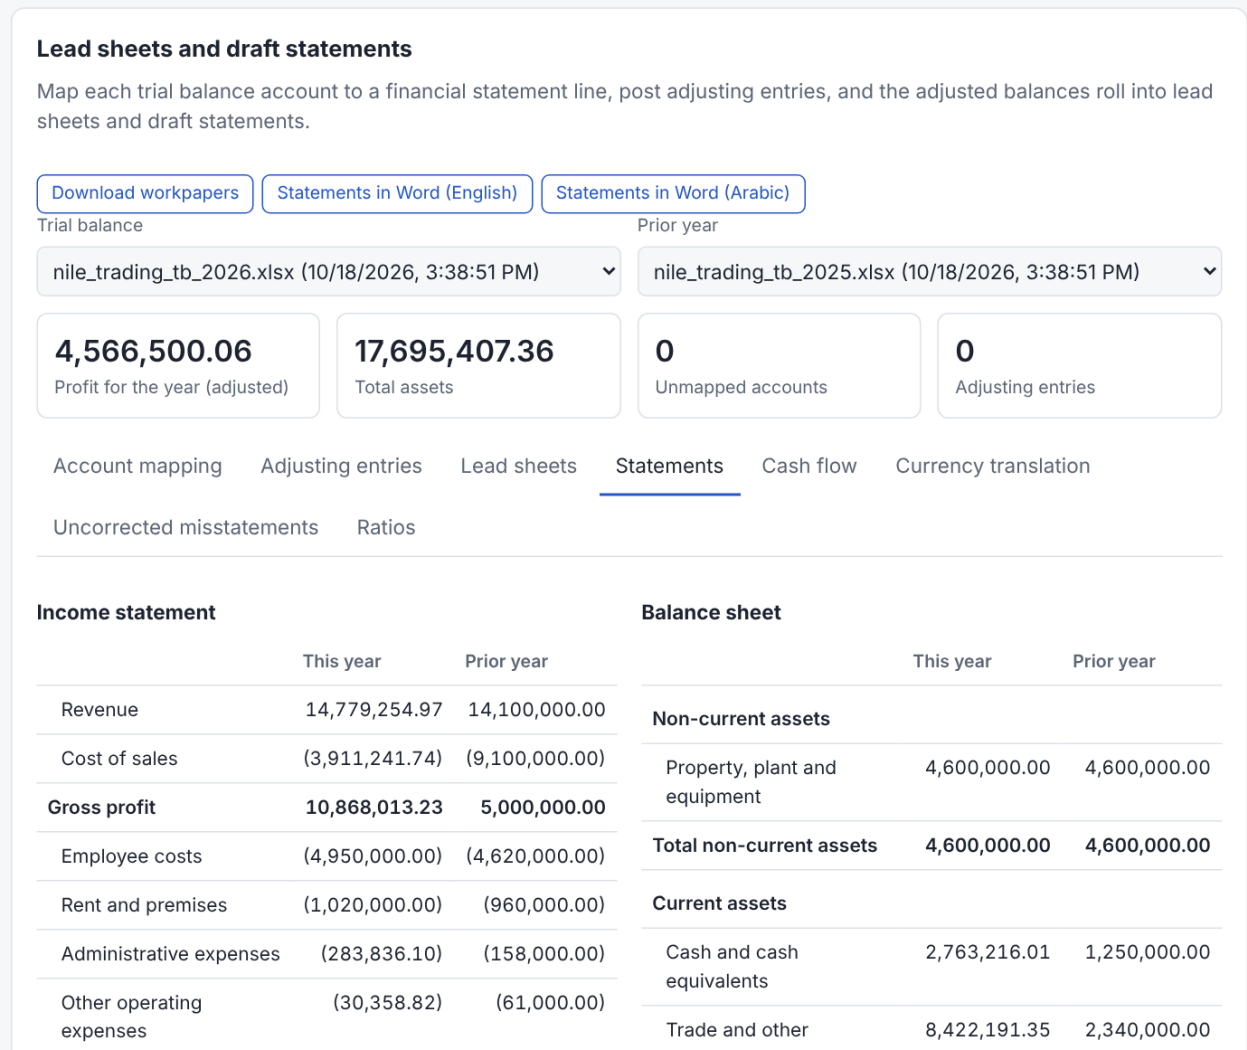

- Random, systematic and monetary unit sampling, with stored seeds.
- Sample size calculation for MUS.
- Results evaluation with projected misstatement and upper limits.
- Vouching sample items against documents, with AI reading invoices.
- Tick marks with a firm legend and cross-references.

7. Specialist areas

- Bank reconciliation with automatic matching and items cleared after the period end.
- AI reading of bank statements and invoices (PDF and images).
- AI summaries of contracts and board minutes.
- External confirmations tracker.
- Related parties register with ledger scan.
- Fixed asset register analysis tied to the trial balance.
- Inventory count with item selection and sign-off.
- Payroll tests (duplicate employees and bank accounts, payroll against the ledger).
- IFRS 16 lease calculator.
- IFRS 9 expected credit loss matrix.
- Loans and covenant tests.
- Accounting estimates (ISA 540) with retrospective review.
- IFRS disclosure checklist with AI check.
- VAT reconciliation against returns.
- Group audit (ISA 600): components, component materiality and consolidation eliminations.
- Foreign currency translation.

8. Financial statements

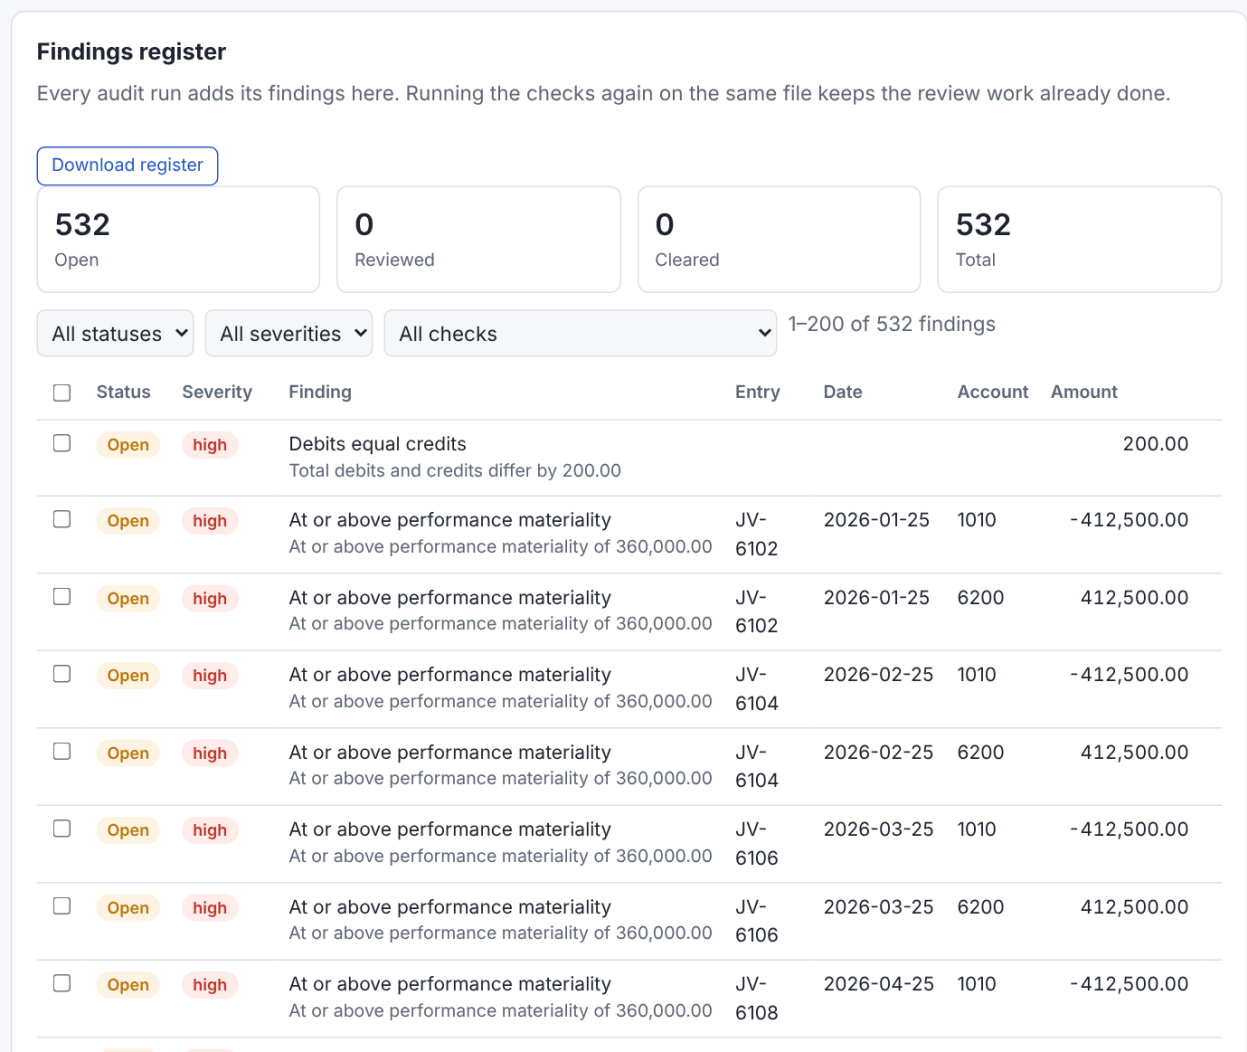

- Account mapping with suggestions and AI for unmapped accounts.
- Adjusting, reclassification and proposed entries with numbering control.
- Adjusted trial balance and lead sheets with prior year.
- Draft income statement, balance sheet and cash flow statement (indirect).
- Uncorrected misstatements summary against materiality.
- Financial statements in Excel and in Word (English or Arabic).

Draft financial statements

9. Findings

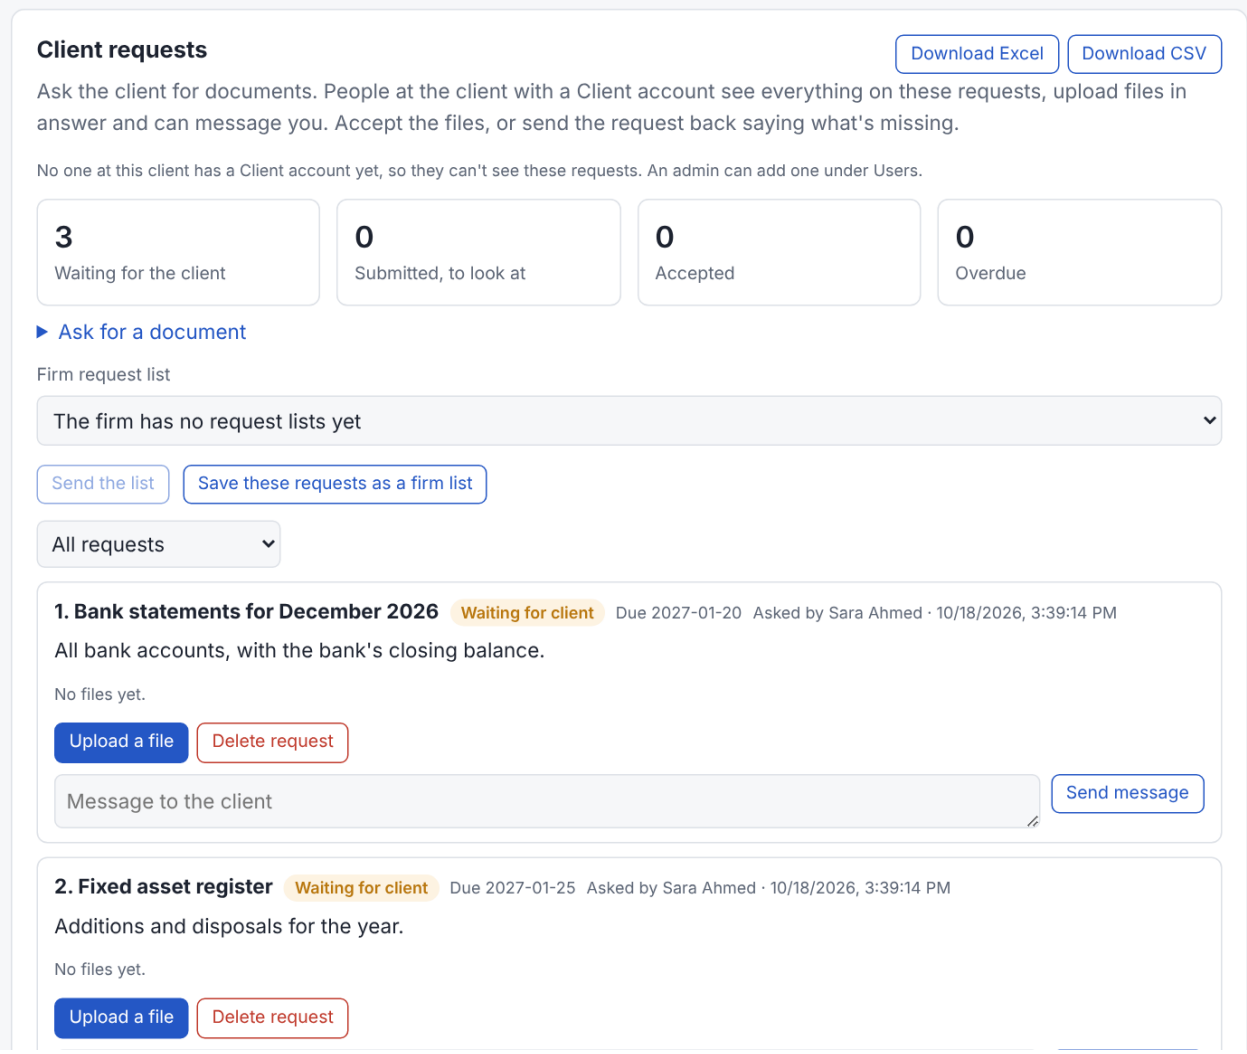

- Findings register with Open, Reviewed and Cleared status and a review trail.
- Evidence attachments.
- Bulk actions and findings added by hand.
- AI assistant to explain flagged entries and draft write-ups.
- Management responses and action plans from the client.
- AI management letter draft.

The findings register

10. Client portal

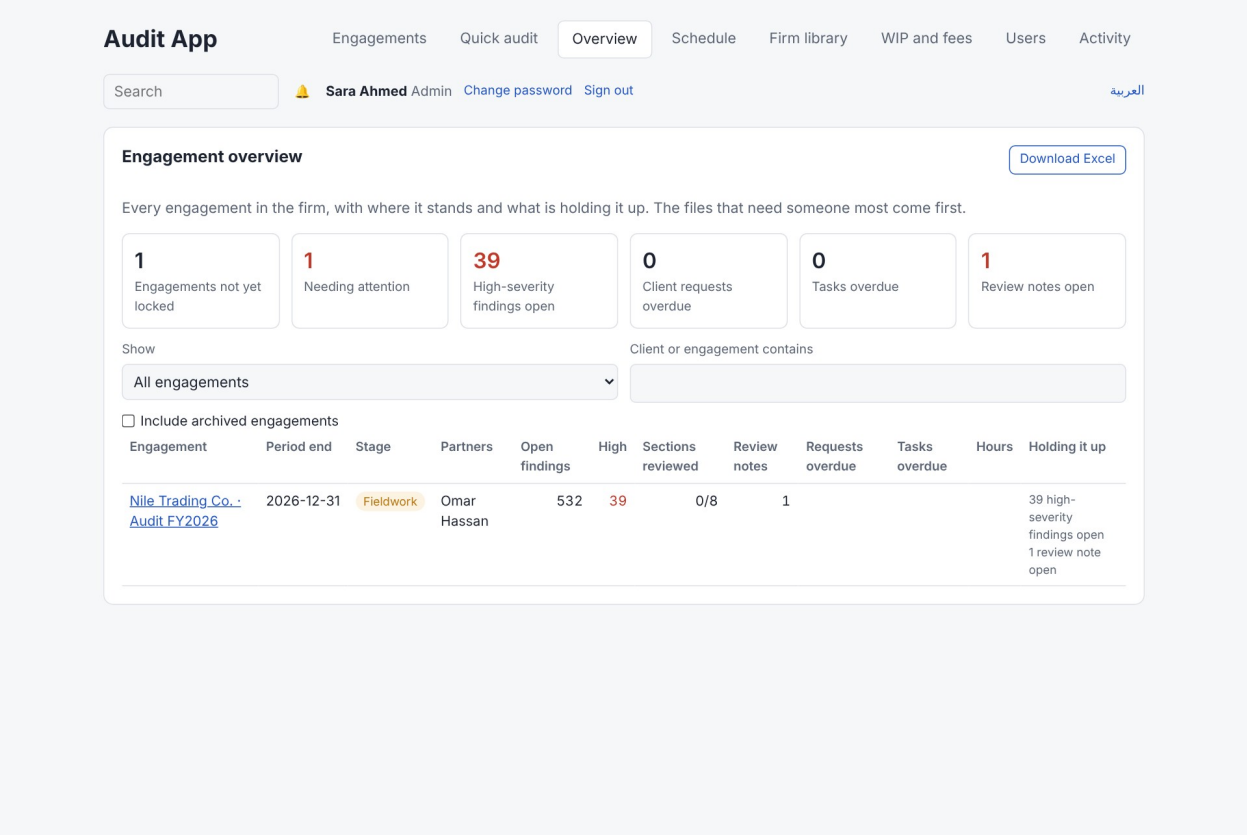

- Document requests with due dates, uploads, messages, accept or send back.
- Firm request list templates.
- Overdue flags and Excel/CSV export.

Client requests

11. Team and practice management

- Tasks with owners and due dates, and a "My tasks" list.
- Time budget against actual hours.
- Staff bookings and a firm-wide schedule that flags over 40 hours a week.
- Fees, invoices and recoverability; firm WIP page with hourly rates (partners and admins).
- Overview of all engagements for reviewers and partners.
- Search inside uploaded documents.

Overview of all engagements

12. Review and completion

- Section sign-off as prepared and reviewed, flagged again if the section changes.
- Review notes with replies and clearing.
- Completion checklist, going concern, subsequent events and written representations.
- Firm checklists copied into engagements.
- Engagement quality review (EQCR) with its own sign-off.
- Auditor's report draft (ISA 700/705/706) with key audit matters, in Word (English or Arabic).
- Partner completion sign-off.

13. Closing and next year

- Audit file pack: one zip with every workpaper, an index, sign-offs and the activity log.
- Lock and archive engagements; admin unlock with a reason.
- Roll forward to next year, choosing what comes across.

14. Security and hosting

- Passwords hashed with scrypt; secure, HTTP-only session cookies over HTTPS.

- Runs on PostgreSQL; daily backups kept for 14 days.
- AI features are optional, logged, and only send data when a user presses an AI button.
